PROFESSIONAL SUMMARY

I'm an iOS Developer with 5+ years of experience building scalable, high-performance mobile applications across fintech, education, and fitness domains. Strong expertise in Swift, UIKit, and SwiftUI, with a focus on clean architecture, performance optimization, and delivering high-quality user experiences.

Proven track record of improving application stability, optimizing performance, and delivering complex features in cross-functional teams. Actively leveraging AI-assisted development tools (Claude, Cursor) to enhance engineering productivity, automate workflows, and improve code quality across the development lifecycle.

TECHNICAL SKILLS

Languages & Frameworks

- Swift, SwiftUI, UIKit, Dart (Flutter)

Architecture & Patterns

- MVVM, MVC, MVP, Modular Architecture, Clean Architecture (practical exposure)

Concurrency & Performance

- GCD, Async/Await, Memory Management, Xcode Instruments

Networking & Data Handling

- RESTful APIs, Alamofire, Moya, JWT Authentication

Tools & Platforms

- Git, GitHub, GitLab, Jira
- Firebase (Analytics, Crashlytics, Dynamic Links)
- CI/CD (basic experience)

AI-Assisted Development & Automation

- Integrated Claude for automated code review and team workflow optimization
- Connected Claude with Slack & Linear to streamline issue tracking and communication
- Used Cursor for AI-assisted coding, refactoring, and faster feature delivery
- Reduced manual review effort and improved code consistency through AI-supported processes

EDUCATION

Bachelor of Software Engineering

HCMC University of Industry and Trade (HUIT)

2016 – 2020

WORK EXPERIENCE

iOS Developer – S3 Corp

Oct 2023 – Present

Ganbaru Method (Fitness & Social Platform)

Key Achievements:

- Improved application performance by ~25% through UI optimization and efficient API handling
- Reduced crash rate and improved app stability using Firebase Crashlytics monitoring
- Successfully implemented in-app purchases and auto-renewable subscriptions using StoreKit
- Optimized memory usage and resolved leaks using Xcode Instruments

AI Impact:

- Integrated Claude-based code review workflow to improve code quality and reduce review time
- Leveraged AI tools (Cursor) to accelerate feature development and refactoring
- Enhanced team collaboration by connecting AI workflows with Slack for faster feedback loops

Responsibilities:

- Developed scalable features using Swift, UIKit, and SwiftUI
 - Applied MVVM architecture with Combine for reactive programming
 - Integrated Firebase Analytics, push notifications, and crash reporting
 - Collaborated closely with backend and product teams to deliver high-quality features
-

iOS Developer – S3 Corp

Apr 2023 – Oct 2023

Happy Lof School (Education Platform)

Key Achievements:

- Designed and established initial project architecture and codebase structure
- Delivered multiple core features including authentication, quizzes, video learning, and scheduling
- Improved user experience across devices with responsive and adaptive UI design

Responsibilities:

- Built core features using Swift, UIKit, and SwiftUI
 - Integrated Firebase services (Analytics, Dynamic Links, Crashlytics)
 - Optimized application performance and ensured maintainable code structure
-

Mobile Developer (iOS & Flutter) – S3 Corp

Mar 2022 – Mar 2023

Huong Nghiep LwL (Career Orientation Platform)

Key Achievements:

- Developed cross-platform features using Flutter with efficient state management (Bloc/Cubit)
- Implemented real-time communication features using Socket.IO
- Increased user engagement through notifications and analytics tracking

Responsibilities:

- Built authentication, chat, course registration, and community features
 - Applied structured state management (Bloc/Cubit) for scalability
 - Integrated Firebase and third-party services
-

iOS Developer – Minerva

Dec 2020 – Mar 2022

S-Connect (Digital Banking Application)**Key Achievements:**

- Delivered secure financial features including biometric authentication and transaction flows
- Implemented QR payment and bill payment functionalities
- Ensured high reliability and performance in a fintech environment

Responsibilities:

- Developed core banking features using Swift and UIKit
 - Integrated RESTful APIs and secure authentication (JWT, biometrics)
 - Optimized performance and handled bug fixing to maintain application stability
-

iOS Developer – Minerva

Mar 2020 – Dec 2020

Smart Home (IoT Application)**Key Achievements:**

- Built IoT-based mobile application to control smart home devices (lights, fans, curtains, etc.)
- Implemented MQTT-based communication for real-time device control

Responsibilities:

- Developed UI and device control features using SwiftUI
 - Maintained code quality and improved application performance
-

PROJECT HIGHLIGHTS

- Experience across Fintech, EdTech, Fitness, and IoT domains
- Strong focus on performance optimization, scalability, and clean architecture
- Hands-on experience with AI-assisted development to improve productivity and code quality
